DIAMOND REPORT

This report is a statement of the diamond's identity and grade including all relevant information.

	NUMBER 1		MUMBAI, June 12, 2015														
	LABORATORY REPORT (ORIGINAL)				TO WHOM IT MAY CONCERN.												
				110.71			The	symbol	s do not	usually re	eflect ti	he size	of the	characte	ristics.		
DESCRIPTION	NATURAL DIA	Red symbols indicate internal characteristics.															
SHAPE AND CUT	HEART BRILL	Green symbols indicate external characteristics.															
CARAT WEIGHT	1.61 CARAT						T	>	\sim			\langle		$ \land$			
Measurements	6.78 x 8.15 x 4																
CLARITY GRADE	SI 1			HT H N													
COLOR GRADE				V X ··· X V L													
Fluorescence FINISH	NONE																
Polish - Symmetry	VERY GOOD																
Proportions	VERY GOOD																
Table Size	58%																
Crown Height	13.5%		insignificant external details, visible under high magnification only, are not shown														
Pavilion Depth	40.5%					high thag hill and to fly, all for showin											
Girdle Thickness	MEDIUM TO T																
Culet	POINTED																
Total Depth	<mark>58.5%</mark>		Gemologist (01)														
LASERSCRIBE	IGI 16751071	7								features incl larked pape omposite, ex	r and add	ditional fea	atures not	listed,	回称		
													۵Ş				
	CLARITY GRADE:		vvs ₂		VS1	VS	2	SI	SI	2	I ₁	l ₂	l ₃				
	COLOR GRADE :	D E F	G	н і	J	К	L	М	Ν	0	Ρ	Q	R	S - Z	FANCY	COLOR	
	PROPORTIONS - MAR MEASUREMENTS - MA		mm														
	The gemological analy	ysis of diamond	s, precious	s stones and	d other r	minerals	must b	e carrie	d out by	gemoloc	gists with	h many	years e	experience	e in this fiel	d	

The gemological analysis of diamonds, precious stones and other minerals must be carried out by gemologists with many years experience in this field who have a keen sense of the professional code of ethics governing their work as well as a thorough knowledge of crystallographic, optical and physical phenomenon.

The identification of the various species and varieties of stones, the distinction between natural and synthetic material, as well as various treatment methods currently encountered are all very sensitive factors. More specifically for diamonds, the laws of refraction and dispersion of light, the related geometric data as well as knowledge of all aspects involved in the cutting process are essential.

This gemological report is provided upon request of the customer and/or the owner of the gem. By making this report I.G.I. does not agree to purchase or replace the article. Neither I.G.I. nor any member of its staff shall, at any time, be held responsible for any discrepancy which may result from the application of other grading methods. Neither the client nor any purchaser of the gem shall regard this Report as an appraisal nor as a guaranty or warranty.

This report is subject to the terms and conditions set forth above and on reverse.
