The laboratory growth diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). A laboratory grown diamond is a diamond that has essentially the same chemical, physical and optical properties as a mined diamond. The IGI Report is a growing group of many different manufacturers' products. IGI employs and utilizes those techniques, equipment and procedures that are deemed appropriate for the examination of the diamond being examined currently available to IGI, including, without limitation, 10X magnification, corrected, triplet loupe, binocular microscope, master color comparison stones, non-contact-optical spectrometer and density gradient column. IGI does not use X-ray fluorescence instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE. FOR THE FULL LIST OF LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-BUY-IGI.
