The laboratory growth diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man-made and controlled methods. I.G.I. employs the most advanced and sophisticated equipment currently available to I.G.I., including, without limitation, 10X magnification, corrected triple loupe, binocular microscope, master color comparison stones, non-contact optical spectrometer, Diamond Sure™ and Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by I.G.I. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED. ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE. FOR CREDITED INFORMATION, PLEASE VISIT WWW.IGI.ORG OR CALL 1-888-BUY-IGI5.
