The laboratory grown diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). Laboratory grown diamonds are one of the most chemically, physically and optically identical products of nature. IGI employs the most advanced growth techniques and manufacturing processes available to IGI, including, without limitation, 10X magnification, corrected color, fluorescence, and clarity grading. IGI uses the most advanced measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with regard to the importance of and interrelationship between cut, color, clarity and carat weight.
