The laboratory grown diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). IGI's examination was limited to identifying the material as being a physical and optical properties as mined diamonds, with the exception of being grown in a man-made environment. IGI does not provide information regarding the origin of the diamond (a manufactured product). IGI's diamond uses and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected vision, ultraviolet light, infrared spectroscopy, Raman spectroscopy, photoluminescence measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with regard to the importance of and interrelationship between cut, color, clarity and carat weight.
