The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). IGI's laboratory grown diamond grading was initially a name chemical, physical and optical properties of the diamond, with the exception of the grower's name (an artificial process product). IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected microscope, ultraviolet light, infrared spectrometer, Raman spectrometer, measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advised security features. A duly accredited gemologist or jeweler can advise you with relevance the importance of and interrelationship between cut, color, clarity and carat weight.
