I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I., including, without limitation, 10X magnification, corrected microscope, double microscope, polarized light microscope, non-destructive optical measuring devices, diamond grading and viewing equipment, and other instruments and instruments and/or processes as deemed appropriate by I.G.I. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with reference to the importance of and interrelationship between color, clarity and carat weight.
